

Caroline McIlwraith
Design Manager

“

I enjoy being involved from the feasibility stage of the design, working closely with Clients and the Design Team, to manage the project through to construction.

I liaise with my Planning, Estimating, Operations and Commercial colleagues on a daily basis, which has increased my knowledge of the whole construction process.

In 2019, I also participated in the ‘Female Only Constructionarium’ event with twenty students from STEM backgrounds. It was very encouraging to see future female M&E Engineers, Quantity Surveyors and Civil Engineers working together.

”
